SOLUM

USE CASES

Pick by light

allows for more efficient order picking

Roaming Solution

reduces time spent on tracking goods traveling from Plant A to Plant B

Trolley Solution

enhances internal transport tracking efficiency

Smart Ordering

activates wireless and automated stock/ parts ordering per shelf

Manufacturing Instruction

allows for digital labels to display daily production activity

Equipment Management

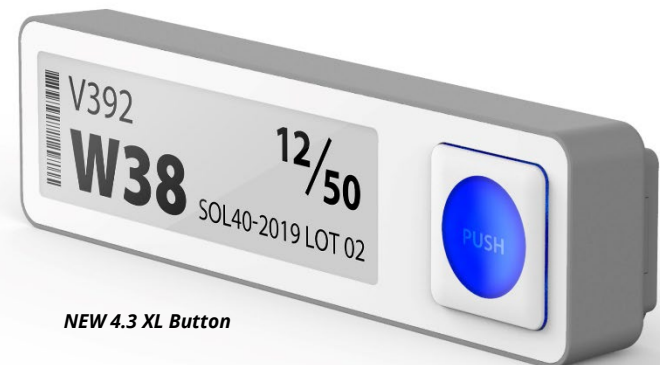

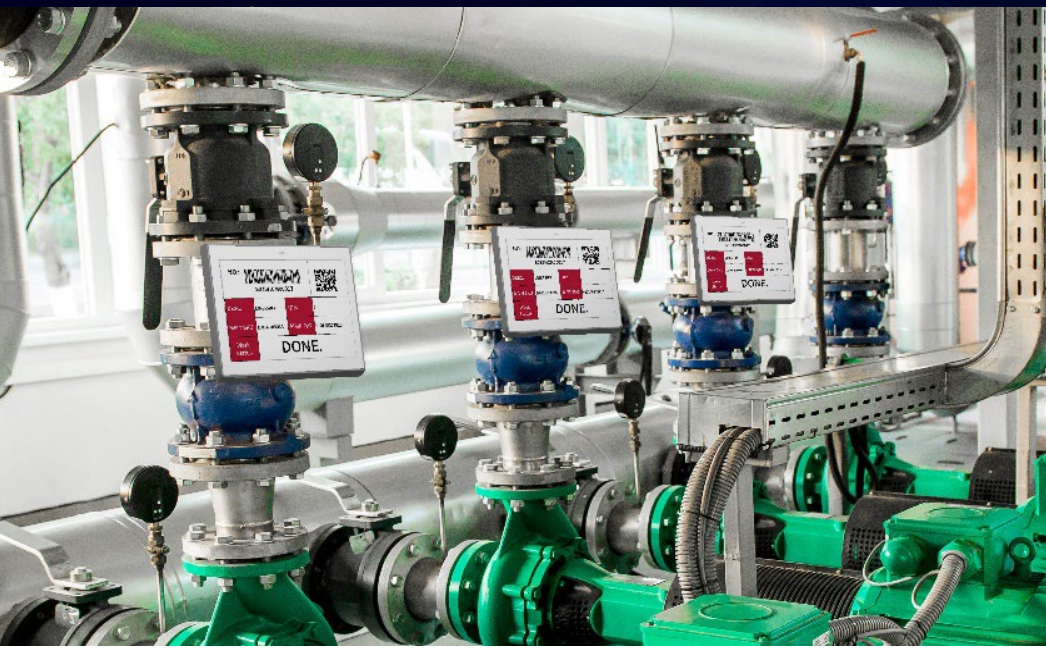

shows the history of the equipment and date of procurement

SOLUM, a spin-off company from Samsung, inherited and developed superior wireless communication technology and product solution for the last 45 years. They provide total ESL solutions to industrial clients.

With extensive applications in industry offer our ESL the ideal basis to digitize, automate and thus optimize your working processes.

Our ESL increase the speed of business agility. To make it possible, our ESL are also available in Sub-Giga. This allows for long working range, low interference data transmission, fast updates and data exchange - making it an ideal IoT solution in the industrial environment.

NEW 4.3 XL Button

FEATURES

Battery lasts up to 10 years
maximize your investment longer

Up to 10x faster for
a new level of operational efficiency

Multifunctional buttons
make user interactions easier

Multi-color LED
allows for multiple signal indications

Choose from 11 different sizes*

so you can pick the size that you need

- * 1.6" 4.3"
- 2.2" 4.3" XL button
- 2.6" 6.0"
- 2.7" 7.5"
- 2.9" 11.6"
- 4.2"

Industrial applications rely on automation, feasibility and simplicity. Properties that ensure increased productivity. This is the target of ESL whether they are applied as display storage or in process flows. Due to their high modularity and adaptability to industrial processes, the use-cases are extremely various.

The ESL of SOLUM allow for more interaction and communication all happening through the display, its LED indicator, and a click of a button - increasing your productivity, reducing error rates and processing your working processes faster and more transparently.
